

AN ANIMAL DEDUCTION GAME FOR 2 TO 6 ESCAPEES AGES 8+ BY LEO COLVINI

It's not easy being a zoo animal. The enclosures are far too small for your needs, the daily routine is boring, and the visitors to the zoo are too obnoxious. For years, the visitors have been gawking at you and throwing all sorts of trash into your enclosures. And now, due to an unfortunate incident, you are all going to be transferred to a smaller zoo in 8 days.

Now it's totally clear: You must break out of the zoo—ideally within the next 7 days.

There are multiple ways to escape, and on closer inspection, the visitors' trash seems to provide the most helpful possibilities. If you can collect enough trash, you could put one of your escape plans into action. However, the zookeepers clean your enclosures at the beginning of each day and remove all the trash that has been thrown in.

To make matters worse, you find it difficult to communicate with the other animals. The monkey screeches excitedly and the elephant trumpets loudly, but what are they trying to tell you?

What trash can they contribute to the escape plan? Which escape plan is the most promising?

You must find a way to communicate. It's high time to break out of the zoo!

KuZOOKA is based on the word *kuzuka* in the Swahili language, which is spoken in many areas in East Africa. It means *breakout*.

GAME COMPONENTS

1 double-sided Gameboard

Front: standard game

Back: High Security Zoo variant

Escape Zone

51 Item cards in 6 colors

6 Popcorn Box 7 Ice Cream Spoon 8 Popsicle Sticks 9 Coins 10 Scarves 11 Balloons Back

Megaphone

10 Animal cards

Front with a brief explanation of the animal's special ability

Back

20 Experience Stars

(15 Value-1 & 5 Value-5)

10 Experience cards

Front

Back

3 Difficulty Level cards

Easy

Normal

Difficult

6 Overview cards

6 Universal Tool cards

Front

Back

120 wooden Animal tokens

(12 per Animal)

GOAL OF THE GAME

As a group, you are trying to escape from the zoo within 7 Rounds.

On your turn, you may place 1 of your Animal tokens in a space on the gameboard's path through the zoo. You must always place a new Animal token in a space ahead of the furthest advanced Animal token already in place on the gameboard's path.

Or you could choose to suspend your escape. In this case, everyone reveals all their Item cards. If your faceup cards now contain at least as many items with the same color as the space with the furthest advanced Animal token, you gain experience. This will allow you to deal out more cards in future rounds.

If you have an Animal token in one of the 6 spaces in the Escape Zone at the end of the path and there are enough matching cards faceup, you succeed in escaping and immediately win the game.

SEQUENCE OF PLAY

Important: You may never discuss the cards in your hand.

You play a maximum of 7 Rounds. Each Round consists of the following 3 Phases:

PHASE 1:
Preparation

PHASE 2:
Communication Between Animals

PHASE 3:
Evaluation

PHASE 1: PREPARATION (OMIT FOR ROUND 1)

Shuffle all 51 Item cards and any Universal Tool cards you may have gained. Then deal out the number of cards as directed by on the top faceup Experience Card, beginning with the player with the Megaphone. Once you have unlocked **Experience Level 2**, you will draw additional cards as indicated and place them faceup next to the gameboard.

Example: Once you are at Experience Level 3, you will deal out 22 Item cards (beginning with the player with the Megaphone) and then you will deal 2 additional Item cards faceup next to the gameboard.

PHASE 2: COMMUNICATION BETWEEN ANIMALS

The player with the Megaphone starts, and players take Turns in clockwise order until 1 player chooses *Option B: Suspend the Escape*. On your turn, you **must** choose 1 of 2 options:

A) Suggest Escape Plan

B) Suspend the Escape

You may also use your Animal card's ability **once per Round**.

A) Suggest Escape Plan

Place 1 of your Animal tokens in a space on the path through the zoo in accordance with the following:

The path through the zoo is divided into **zones** with 5 or more spaces that differ in light or dark background colors. The last zone highlighted in white is the **Escape zone**.

Place **the very first Animal token in the first Round** on one of the 5 spaces in the first zone, which is next to the Start sign.

If there's already 1 or more Animal tokens on the path, place your Animal token **on a space of your choice ahead of the furthest token already in place**. This space must be in either the same zone or the next zone immediately following it. You are not allowed to skip any zones.

Note: Placing your Animal tokens usually tells the other players something about the cards in your hand—perhaps not the exact number, but at least the color.

Example:

Jessy starts the game. She has 2 yellow Popcorn Box cards, 4 green Balloons cards, and 1 red Ice Cream Spoon card. She would like to indicate she's holding Balloons cards by placing 1 of her Eagle tokens on the green 2.

Katja's turn is next. She has 1 blue Coins card, 1 yellow Popcorn Box card, 1 green Balloons card, 2 red Ice Cream Spoon cards, and 2 orange Popsicle Sticks cards. Katja would like to place her Chameleon token on an orange space. However, she isn't allowed to place in the orange 1 space, as it is behind the token on green 2. She doesn't want to place it on the orange 2 space because it is a large jump ahead and she would rather leave more space for the other players to give useful hints. For the same reason—and since she has 2 red cards and only has 1 green card—she places her Chameleon token on the red 1 instead of on the green 3 since it doesn't skip any spaces.

Now it's Amir's turn. Amir has 3 blue Coins cards, 1 yellow Popcorn Box card, 1 green Balloons card, and 1 purple Scarves card. Amir could put one of his Snake tokens on the green 3 since he can support this escape plan. However, because he has so many blue cards, he wants to strongly recommend this escape plan instead. Amir isn't allowed to place his token on the blue 3, as this would cause him to skip over a zone. He decides to place his Snake token on the blue 2.

OPTIONAL: USE YOUR ANIMAL'S ABILITY

Once per Round, you can use your Animal's ability. Simply follow the instructions on your Animal card. Then flip your Animal card facedown to indicate you've used its ability this Round.

A complete overview of all of the zoo Animal cards can be found on page 8.

B) Suspend the Escape

You suspend the escape attempt. Immediately take the Megaphone and then continue with **Phase 3: Evaluation**.

Note: You usually don't have enough cards to escape, especially in the first few Rounds. Sometimes you need to suspend the escape in order to get more Experience, which gives you more cards.

PHASE 3: EVALUATION

Now everyone reveals all the cards in their hands. The color of the space with the furthest advanced Animal token is your **Escape color**. The number in this space is your **Escape value**.

Now count how many cards you have all revealed in the **Escape color** (including those that were already faceup. In a game with 4 or fewer players there will be no additional faceup cards in Round 1).

- If you have **at least as many cards** in the **Escape color** as the **Escape value** specifies, you gain Experience Stars (except for the first spaces along the path without them). The number of Experience Stars you gain is depicted in the star next to the space with your Escape color and value. Place the Experience Stars gained next to the Difficulty Level card.
- If you have **exactly as many cards** in the **Escape color** as the **Escape value** specifies, you also gain a **Universal Tool card** (including the first few spaces on the path where you don't receive Experience Stars). Place this card facedown on top of the Item deck.
- If you have **fewer cards** in the **Escape color** than the **Escape value** specifies, you won't gain a Universal Tool card or any Experience Stars this Round.

UNIVERSAL TOOLS

Universal Tools help you in your escape attempts. Universal Tools are wild cards that count for all colors, which means they always count for the Escape color. In other words, you always count all faceup cards in the Escape color plus all Universal Tools from your hands or that are faceup next to the gameboard.

Example: In Phase 3, you have a total of 26 cards in your hands. Another 5 cards have been placed faceup next to the gameboard. Katja suspends the escape attempt, which triggers the Evaluation. The furthest advanced Animal token was placed on the yellow 6. Now check whether there are at least 6 yellow cards (including any Universal Tool cards) among the 26 cards from your hands and the 5 faceup cards.

UNLOCK EXPERIENCE LEVELS

After each Evaluation, you may spend your Experience Stars to unlock your next Experience Level. Your Difficulty Level card shows how many Experience Stars you need to spend to unlock the next Experience Level. After spending the Stars, reveal the next Experience card and place it faceup on the previous card. The new card indicates how many cards you will be dealt in the following Round and how many cards you will display faceup.

Note: You may unlock multiple Experience Levels per Round if you have enough Experience Stars to pay for them. The final Experience Level is 10.

END OF ROUND

If none of the End Game conditions have been met, **advance the Animal token 1 space on the Round track** and continue with **Phase 1: Preparation**.

Flip your Animal card faceup if you used its ability last Round.

END OF GAME

SUCCESSFUL ESCAPE

If the furthest ahead Animal token is in one of the **last 6 spaces of the Escape zone** at the end of the path through the zoo **and** you have at least as many cards in the Escape color as specified for the Escape value during **Evaluation**, you have successfully **escaped** and **immediately win** the game.

FAILED ESCAPE

The game also ends after the 7th Round. If you haven't escaped by this point, you lose the game.

COMMUNICATION

If you want to be strict with the rules, you aren't allowed to talk to each other about the game except by placing your Animal tokens and using your Animal's ability. In practice, you may want to discuss why certain decisions were made and find your own level of permitted communication. Play in a way that lets you enjoy the game.

VARIANT: HIGH SECURITY ZOO

Use the reverse side of the gameboard. You will need more cards to successfully escape. Since you won't have the required number of cards to escape for any color in the deck at the beginning of the game, you'll need to acquire some Universal Tools first.

We suggest using this variant only after you've won a few games with the front side of the gameboard.

THE ZOO ANIMALS

Your Animal gives you a special ability you may use once per Round. The exact timing is explained below. Flip your Animal facedown for the remainder of the round after using its special ability.

Eagle: You may ask another player if they have at least X cards of a certain color at the **start** of your turn. (You can use any number of your choice for X.) If the person asked has at least as many cards as you just asked, they must answer your question with yes, otherwise with no.

Example: Stefan asks Annie: “Do you have at least 3 yellow Popcorn Box cards?” Since Annie has 4 yellow cards, she answers the question with “Yes.”

Monkey: Give 1 of the cards in your hand to another player. That player must now give you 1 card from their hand (including the one you just gave them). You may use this ability at the **beginning or end** of your turn.

Chameleon: You may draw 1 card from the deck and add it to your hand at the **beginning or end** of your turn. Then you must discard 1 card from your hand facedown.

Elephant: You may designate the player who will play next at the **end** of your turn.

Sloth: You may pass and do nothing **instead** of choosing **A) Suggest Escape Plan** or **B) Suspend the Escape**. It's the next player's turn.

Lion: You may place 1 card from your hand facedown under your Lion card at the **beginning** of your turn. Then flip the Lion over as a reminder. This card returns to your hand at the beginning of the next Round in Phase 1 instead of being shuffled back into the deck. This way you'll have 1 additional card in your hand after the cards have been dealt for the next Round.

Rhinoceros: If you choose the *Suggest Escape Plan* option, you may simultaneously place 2 Rhino tokens. These tokens must be placed adjacent to each other following the normal placement rules.

Note: The token furthest ahead will count for the Evaluation.

Parrot: If you choose **Option A) Suggest Escape Plan**, you may place your Animal token in the space with the player's Animal token that is furthest ahead on the zoo path.

Seal: Once per Round, you may place your Animal token on a zoo path space without paying attention to the zones.

Note: This card can only be used if there are 4, 5, or 6 players.

Snake: At the **beginning** of your turn, you may discard all the cards in your hand facedown. Then draw 1 card less than you discarded from the deck to refill your hand.
