

Instructions

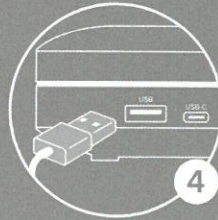

Plug the power adapter into the jack labeled "Power" on the rear of your PhoneSoap.

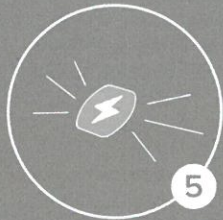

Plug the other end of the adapter in a wall outlet.

Lock your phone and place it in the sanitizing bay.

If you'd like to charge your phone during cleaning, plug your phone's charging cable into PhoneSoap.

Close the lid to begin sanitizing. After 10 minutes PhoneSoap will automatically shut off while continuing to charge your device.

Frequently asked questions

Can I leave my case/screen protector on my phone?

Yes! That is the part you touch, so we actually encourage you to leave them on so they get sanitized, too!

When I close the lid after I finish using PhoneSoap, it starts another cycle. Do I need to unplug it?

No, PhoneSoap uses bulbs that don't use heat, so it is safe to let it run for an additional cycle.

How do I "lock" my phone?

Make sure your screen is disabled or turned off. Most smartphones have a button on the side that does this.

What else can I put inside PhoneSoap?

As long as it fits and is not wet, you can sanitize it using PhoneSoap (credit cards, keys, pacifiers, etc).
